Brief Note on Event

Gujarat Science City, located in Hebatpur, Ahmedabad, is part of a government initiative to draw more students towards education in science. The center hosts an IMAX 3D theatre, an energy park, a hall of science, Planet Earth, an amphitheater, Life Science Park and dancing musical fountains among others. There are many building in science city to displays and demonstrate different concepts, out of which, students visited "Hall of Space & Science" and "Planet Earth".

In Hall of Space & Science, there were various information's displayed about space science, scientist and working model of some Experiments. In the same dome, all the students along with faculty also watched one play and one short documentary on galaxy and life in outer space. After taking lunch at canteen of Science City, student visited "Planet Earth" whose building exterior itself shows earth map. In Planet Earth, there were various displays like different kind of shell, fish from sea. There were different kinds of simulators also to experience like "Coal mine" and "Earthquake".

There is exhibition arranged with different project ideas to save electricity, Reduce pollution and many more new innovative concepts. The expert from different colleges teaches our students about their innovative ideas hence improved our student's knowledge.
